The screenshot displays the RStudio environment with the following components:

- Source Editor:** Contains R code for reading a CSV file and viewing its dimensions and first few rows.
- Console:** Shows the output of the R code, including the dimensions of the data and the first few rows of the data.
- Environment:** Lists the objects in the global environment, including 'Food_waste_data_a...' and 'my_data', both with 214 observations and 12 variables.
- Files:** Shows the file explorer with the 'Food Waste data and research - by country.csv' file highlighted.

R Code in Source Editor:

```
# Get the dimensions (rows and columns)
my_data <- read.csv("Food waste data and research - by country.csv")
# View the first few rows
head(my_data)
```

Console Output:
